Objectives Compare the types of prokaryotes. Explain the characteristics and adaptations of bacteria. Evaluate the economic importance of bacteria. Viruses and Bacteria Make the following Foldable to help you organize information about viruses and bacteria. STEP 1 Fold one piece of paper lengthwise into thirds.

Chapter 18: Viruses and Bacteria - PDF Free Download

Viruses are always changing, so it can be hard to treat viral diseases. Antibiotics work only against bacteria, not against viruses. Antiviral medicines can be used to treat some viral diseases or prevent infection. These medicines keep the virus from entering cells or stop the virus from replicating. Like bacteria, viruses can change quickly and

CHAPTER 13 Bacteria and Viruses - somersetcanions.com

Viruses and Disease • What are some diseases caused by viruses? • Polio, measles, AIDS, mumps, influenza, yellow fever, rabies, and colds. • What are oncogenic viruses? • Viruses which cause cancers. • What is a retrovirus? • Viruses that have their RNA produce DNA instead of the normal DNA to RNA.

include the common cold, influenza, AIDS, chicken pox, and measles. Viruses produce other serious diseases in other animals and in plants. Protection against viruses, either by hygiene or vaccination, is the best way to avoid viral illness. A handful of antiviral drugs have been developed that help reduce the symptoms of specific viruses.

Chapter 18 Bacteria and Viruses - PDF documents

6 CHAPTER 1 Introduction to Viruses described bacteriophages (â€œphagesâ€• for short) in 1915 and 1917, respectively. Before the use of penicillin, it was determined that each type of bacterium can only be infected with a speciï• c type of phage. In other words, phages exhibit a very narrow host range: a phage

Chapter Viruses, Bacteria, Protists, and Fungi - Weebly

Viruses that infect bacteria are called bacteriophages. They enter living cells and, once inside, use the machinery of the infected cell to produce more viruses. Viral Infections Viruses have two methods of infection once inside a host cell. In a lytic infection, a virus enters a cell, makes copies of itself, and causes the cell to burst,

Viruses and Prokaryotes - PC|MAC

Before you read the chapter, think about what you know about bacteria and viruses. In the first column, write three things you already know about these organisms.

3. Name the two kingdoms of bacteria. List one way these groups differ from each other. 4. Describe two

roles bacteria have in the environment. 5. What are three foods that have been made using bacteria? 6. Following a flood, people are often advised to boil their drinking water. Explain why this is necessary. 7. Describe two ways of killing ...

Viruses / Bacteria Worksheet - Dearborn Public Schools

aiding the newly manufactured viruses in escaping from the cell. Much of what is known about virus reproduction comes from studies of the viruses that attack bacteria. This is because bacteria are easily cultured, allowing the investigator plenty of material to work with.

Branches On The Tree Of Life: VIRUSES AND BACTERIA

KEEPING BACTERIA AND VIRUSES FROM HARMING US 1. ANTIBIOTICS Bacteria and viruses can be controlled. Since bacteria are living, one way you can control them is to kill them. This can be done by taking antibiotics such as penicillin or tetracycline. The word antibiotic means "against living things" and they only kill living things.
