In chemistry, bases are substances that, in aqueous solution, release hydroxide (OH^-) ions, are slippery to the touch, can taste bitter if an alkali, change the color of indicators (e.g., turn red litmus paper blue), react with acids to form salts, promote certain chemical reactions (base catalysis), accept protons from any proton donor or contain completely or partially displaceable OH^- ...

Base (chemistry) - Wikipedia

Chemistry is the scientific discipline involved with elements and compounds composed of atoms, molecules and ions: their composition, structure, properties, behavior and the changes they undergo during a reaction with other substances. In the scope of its subject, chemistry occupies an intermediate position between physics and biology. It is sometimes called the central science because it ...

Then you have come to the right place. Here you will not get the notes in PDF rather you can read online without downloading anything. Chemistry for most of the Pakistani students is difficult, but if you have all the content like notes, videos, and easy articles on the topics, this subject will be a piece of cake.

Readers continue to turn to Klein's Organic Chemistry as a Second Language: First Semester Topics, 4th Edition because it enables them to better understand fundamental principles, solve problems, and focus on what they need to know to succeed. This edition explores the major principles in the field and explains why they are relevant. It is written in a way that clearly shows the patterns in ...

No Evidence To Support Homeopathic Immunizations. Certain homeopathic products (called "œnosodes" or "œhomeopathic immunizations") have been promoted by some as substitutes for conventional immunizations, but the U.S. Centers for Disease Control and Prevention says there's no credible scientific evidence to support such claims.

1. Basic concepts1.1.. Categories of nanostructured materialsOne of the very basic results of the physics and chemistry of solids is the insight that most properties of solids depend on the microstructure, i.e. the chemical composition, the arrangement of the atoms (the atomic structure) and the size of a solid in one, two or three dimensions.

2.. Artificial neural networksAn artificial neural network , is a biologically inspired computational model formed from hundreds of single units, artificial neurons, connected with coefficients (weights) which constitute the neural structure. They are also known as processing elements (PE) as they process information. Each PE has weighted inputs, transfer function and one output.
