The Python Tutorial. This is the official tutorial. It covers all the basics, and offers a tour of the language and the standard library. Recommended for those who need a quick-start guide to the language.

Learning Python - The Hitchhiker's Guide to Python

Python is an interpreted, high-level, general-purpose programming language. Created by Guido van Rossum and first released in 1991, Python has a design philosophy that emphasizes code readability, notably using significant whitespace. It provides constructs that enable clear programming on both small and large scales. Van Rossum led the language community until stepping down as leader in July 2018.

Python (programming language) - Wikipedia

Get Started scripting language. A scripting language is a form of programming language that is usually interpreted rather than compiled. Scripting languages are typically converted into machine code on the fly during runtime by a program called an interpreter.
