V-chip is a technology used in television set receivers in Canada, Brazil and the United States, that allows the blocking of programs based on their ratings category. It is intended for use by parents to manage their children's television viewing. Televisions manufactured for the United States market since January 2000 are required to have the V-chip technology.

- It is distributed four times a year. The first volume was published in september of 2010. - publishes high-level Communications, Research Articles and Mini-Reviews related to all field of electrochemical science and technology.

## Journal of Electrochemical Science and Technology

Real-world manipulation of anions needs receptors to operate in solution. By combining experiment and theory, Flood and colleagues discovered a 1/É›r solvent dependence of solution-phase anion affinities. Surprisingly, electrostatics no longer dominates affinity in solutions of even moderate polarity. Their findings also enable accurate predictions of anion affinities across a wide range of ...
