

effective devops building collaboration pdf

DevOps (a clipped compound of "development" and "operations") is a software development methodology that combines software development (Dev) with information technology operations (Ops). The goal of DevOps is to shorten the systems development life cycle while also delivering features, fixes, and updates frequently in close alignment with business objectives.

DevOps - Wikipedia

This article shares some of the interesting DevOps principles and the advantages in applying them for effective project delivery and turnaround.

Best Practices of DevOps for Effective Project Delivery

To illustrate this, let me share a story – in 1968, Dr. Conway was performing a famous experiment. Together, with a contract research organization of eight people, they were commissioned to produce a COBOL and an ALGOL compiler.

Where to Start With DevOps: Conway's Law

Agile is a software development methodology where the agile team is more concerned with developing the software and releasing it. DevOps, on the other hand, is all about taking software which is ready for release and deploying it, safely and reliably.

How are DevOps and Agile different? - Quora
