How to Install Apache Spark. Although cluster-based installations of Spark can become large and relatively complex by integrating with Mesos, Hadoop, Cassandra, or other systems, it is straightforward to download Spark and configure it in standalone mode on a laptop or server for learning and exploration.

## Getting Started with Apache Spark - MapR

When `hive.cache.expr.evaluation` is set to `true` (which is the default) a UDF can give incorrect results if it is nested in another UDF or a Hive function. This bug affects releases 0.12.0, 0.13.0, and 0.13.1. Release 0.14.0 fixed the bug ().The problem relates to the UDF's implementation of the `getDisplayString` method, as discussed in the Hive user mailing list.

Avro is a remote procedure call and data serialization framework developed within Apache's Hadoop project. It uses JSON for defining data types and protocols, and serializes data in a compact binary format. Its primary use is in Apache Hadoop, where it can provide both a serialization format for persistent data, and a wire format for communication between Hadoop nodes, and from client programs ...

Apache Spark is an open-source distributed general-purpose cluster-computing framework. Originally developed at the University of California, Berkeley's AMPLab, the Spark codebase was later donated to the Apache Software Foundation, which has maintained it since. Spark provides an interface for programming entire clusters with implicit data parallelism and fault tolerance
