The secrets of soil mineral balance that create ideal soil, plant, and animal health are revealed here for the first time. The amazing results that can be achieved by balancing the major cation minerals Calcium, Magnesium, Potassium and Sodium in the soil according to the teachings of Dr William Albrecht and Dr Carey Reams have changed the world of agriculture.

### **The Ideal Soil Book: A Handbook for the New Agriculture**

In the context of nutrition, a mineral is a chemical element required as an essential nutrient by organisms to perform functions necessary for life. Minerals originate in the earth and cannot be made by living organisms. Plants get minerals from soil. Most of the minerals in a human diet come from eating plants and animals or from drinking water. As a group, minerals are one of the four groups ...

Solid is one of the four fundamental states of matter (the others being liquid, gas, and plasma). In solids molecules are closely packed. It is characterized by structural rigidity and resistance to changes of shape or volume. Unlike liquid, a solid object does not flow to take on the shape of its container, nor does it expand to fill the entire volume available to it like a gas does.
