

### **health information technology federal pdf**

Health information technology (HIT) is information technology applied to health and health care. It supports health information management across computerized systems and the secure exchange of health information between consumers, providers, payers, and quality monitors. Based on an often-cited 2008 report on a small series of studies conducted at four sites that provide ambulatory care ...

Health Information Exchange (HIE), the recently released issue brief highlights the importance of a sustainable public HIE. State-run HIEs are mainly utilizing two types of usage fees and, in some instances, using a combination of the two. The first model, the transaction fee model, is used when charging for each set of data that is sent or received.
