High performance computing (HPC) by HPE delivers industry-leading solutions for hpc computing with the power to gain competitive edge, innovate and strengthen research.

### **High-Performance Computing Solutions – Reliable, Available**

GPU computing is the most accessible and energy-efficient path forward for high performance computing (HPC) and the data center. In fact, five of the six Gordon Bell Prize finalists use supercomputers powered by NVIDIA GPUs.. Today, NVIDIA powers the fastest supercomputers in the U.S. and Europe, as well as some of the most advanced systems under construction.

### **A Scalable, Commodity Data Center Network Architecture**

A computer network, or data network, is a digital telecommunications network which allows nodes to share resources. In computer networks, computing devices exchange data with each other using connections between nodes. These data links are established over cable media such as wires or optic cables, or wireless media such as WiFi.. Network computer devices that originate, route and terminate the ...

### **Caddock's Ultra-Precision Voltage Divider Networks**

A supercomputer is a computer with a high level of performance compared to a general-purpose computer. The performance of a supercomputer is commonly measured in floating-point operations per second instead of million instructions per second (MIPS). Since 2017, there are supercomputers which can perform up to nearly a hundred quadrillion FLOPS. Since November 2017, all of the world's fastest ...
