Brain Rules by John J. Medina is a multimedia project explaining how the brain works. It includes a book, a feature-length documentary film, and a series of interactive tutorials.

Stress | Brain Rules

Good balance depends on: 1. Correct sensory information from your eyes (visual system), muscles, tendons, and joints (proprioceptive input), and the balance organs in the inner ear (vestibular system).2. The brain stem making sense of all this sensory information in combination with other parts of the brain. 3. Movement of your eyes to keep objects in your vision stable and keep your bal-

The Storm in my Brain Kids and Mood Disorders (Bipolar Disorder and Depression)

The Storm in my Brain

Heroin binds to and activates specific receptors in the brain called mu-opioid receptors (MORs). Our bodies contain naturally occurring chemicals called neurotransmitters that bind to these receptors throughout the brain and body to regulate pain, hormone release, and feelings of well-being. 9 When MORs are activated in the reward center of the brain, they stimulate the release of the ...

The brain is an organ that serves as the center of the nervous system in all vertebrate and most invertebrate animals. The brain is located in the head, usually close to the sensory organs for senses such as vision. The brain is the most complex organ in a vertebrate's body. In a human, the cerebral cortex contains approximately 14–16 billion neurons, and the estimated number of neurons in ...
