Microsoft BI Labs went live today featuring a look into the future of SQL Server Data Mining in the Cloud. The SQL Server Data Mining team presents a set of prototype web services in the cloud that mirror some of the great predictive analytics functionality available in the Table Analysis Tools for Excel add-in from the SQL Server 2008 Data Mining Add-ins for Office package.

Java is a general-purpose computer-programming language that is concurrent, class-based, object-oriented, and specifically designed to have as few implementation dependencies as possible. It is intended to let application developers "write once, run anywhere" (WORA), meaning that compiled Java code can run on all platforms that support Java without the need for recompilation.
