Baran, Newhouse, Seiple Essentials of Heterocyclic

A heterocyclic compound or ring structure is a cyclic compound that has atoms of at least two different elements as members of its ring(s). Heterocyclic chemistry is the branch of organic chemistry dealing with the synthesis, properties, and applications of these heterocycles.. Examples of heterocyclic compounds include all of the nucleic acids, the majority of drugs, most biomass (cellulose ...

Professor J. Stephen Clark - School of Chemistry

Bioorganic & Medicinal Chemistry publishes complete accounts of research of outstanding significance and timeliness on all aspects of molecular interactions at the interface of chemistry and biology, together with critical review articles. The journal publishes reports of experimental results in medicinal chemistry, chemical biology and drug discovery and design, emphasizing new and emerging ...

American Journal of Applied Chemistry (AJAC) a peer-reviewed open access journal published bimonthly in English-language, provides rapid publication of articles in all areas of applied chemistry and its applications. The attendant goal is to promote widespread acceptance of the Journal as an authoritative and indispensable holding in academic and institutional libraries.

Five-membered heterocyclic amines. The compound pyrrolidine is composed of molecules that contain a saturated ring of five atoms. This cyclic structure is composed of one atom of nitrogen and four carbon.

Nicotine is a molecule containing a pyrrolidine ring attached to a ring of pyridine (other heterocyclic amine). Nicotine belongs to a group of compounds known as alkaloids, which are ...

Heterocyclic amine - Wikipedia

Novel nitrene insertion. An intramolecular insertion reaction of Rh⁺-nitrene into amide C-N and sulfonamide S-N bonds has been developed (see figure) via the unprecedented formation of an N + N ylide from the Rh⁺-nitrene and the amide nitrogen. Experimental and theoretical analyses of the reaction mechanism have also been conducted and support the ylide pathway.

The synthesis of heteroaryl trifluoromethyl selenoethers by the trifluoromethylselenolation of heteroaryl bromides with [(bpy)CuSeCF₃]₂ was investigated. The reaction affords a variety of trifluoromethylselenolated heterocyclic compounds in good yields and tolerates a range of functional groups
