Chess is a two-player strategy board game played on a chessboard, a checkered gameboard with 64 squares arranged in an 8Ã—8 grid. The game is played by millions of people worldwide. Chess is believed to be derived from the Indian game chaturanga some time before the 7th century. Chaturanga is also the likely ancestor of the Eastern strategy games xiangqi, janggi, and shogi.

In chess, the king (â™™,â™š) is the most important piece. The object of the game is to threaten the opponent's king in such a way that escape is not possible (). If a player's king is threatened with capture, it is said to be in check, and the player must remove the threat of capture on the next move. If this cannot be done, the king is said to be in checkmate, resulting in a loss for that player.
