An earthquake is a phenomenon that results from the sudden release of stored energy in the Earth's crust that creates seismic waves. At the Earth's surface, earthquakes may manifest themselves by a shaking or displacement of the ground and sometimes cause tsunamis, which may lead to loss of life and destruction of property. An earthquake is caused by tectonic plates (sections of the Earth's ...

The four volumes have been written so that each stands alone as an independent book, and may be read without benefit of the others. The full meaning of the four books, and the architectural, social, and cosmological scheme they introduce, can only be understood by seeing the interplay of these four complementary points of view.
